Terra Tachyon Philosophers Stone

The Philosophers Stone: Alchemical symbols represent and hold part of the power of the alchemists procedures and substances. The Philosophers Stone is for contemplating your body wisdom, the inherent force which gives life to your body, and to support and honor it. A daily meditation of 20 minutes is recommended while placing your hands near the cube. As an object of art (with lighted base) it is an inspiring energetic object to just look at and relax.
